Dra. Sira Borges,
Brasil

Dear All.

On behalf of the Latin America Federation of Chiropractic – FLAQ, it is my pleasure to invite you to participate in FLAQ's Second Educational Forum and Third Regional Seminar to be held in Mexico City, **April 29 to May 1st** with the support from UNEVE – Universidad Estatal del Valle de Ecatepec.

The first meeting was held in Sao Paulo last October (with the support from the University Anhembi Morumbi) where the Council of Chiropractic Education Working Group presented the first draft for the proposed Latin American Council on Chiropractic Education (CLAEQ / CCE-LA).

Chiropractic education is a very important subject at this moment for our region, due to the fact that chiropractic education programs are blooming everywhere – *Chile* will open two second degree programs this March and a full undergraduate program in 2011; *Mexico* just opened a second school, with a third one on its way and it is a high possibility other countries will follow. It will be very important to set the appropriate standards from the beginning to avoid problems in the future.

As expressed above, it is extremely important to have representatives from each of the existing programs together to express the challenges faced in their countries or regions in order to maintain the high standards already reached by the profession and recognized by the international councils for its proper implementation.

We would like to count with your attendance and your support at this important meeting.

Truly yours,

Carlos Ayres, DC
FLAQ President
