WFC POLICY STATEMENT

SEMINARS FOR NON-CHIROPRACTORS IN ANOTHER COUNTRY

Approved by the Assembly of the World Federation of Chiropractic

Toronto, May 1991

WHEREAS chiropractors from one country presenting seminars or other educational programs on chiropractic to non-chiropractors in other countries are prejudicing the continued recognition and acceptance of chiropractic in those countries;

AND WHEREAS the member associates of the World Federation of Chiropractic are strongly opposed to such seminars or other educational programs;

NOW THEREFORE IT IS RESOLVED by the World Federation of Chiropractic that member associations should take all steps within their powers to prevent their members and all other chiropractors in their respective countries from engaging in such seminars or other educational programs and that member associations shall notify the World Federation of Chiropractic of any such activity to enable appropriate action to be taken.
