WFC/ACC EDUCATION CONFERENCE
OCTOBER 19-22, 2016
DELTA HOTEL, MONTREAL, QUEBEC, CANADA

CHIROPRACTORS:
TRAINING TOMORROW'S
SPINE CARE EXPERTS.
Dear Colleagues

The World Federation of Chiropractic and the Association of Chiropractic Colleges are delighted to welcome you to the 2016 WFC/ACC Education Conference in the enchanting Canadian city of Montréal.

This conference promises to raise the already high expectations of our attendees with a stellar program of cutting-edge topics delivered by leaders in chiropractic education, coupled with excellent networking opportunities.

As you'll see from the program, this three day event is packed with unique sessions that will feature leading educators from around the world. We'll be welcoming speakers and delegates from around the world for an unparalleled learning experience that this year will also feature dedicated sessions on the teaching and learning of manual treatment skills.

Montréal, the largest city in Québec, is the second largest French-speaking city after Paris. With a vibrant cosmopolitan scene and one of the finest restaurant districts, it also exudes charm and architectural beauty.

We look forward to seeing you there.

Subject and Program

In 2005, the WFC produced its identity statement, that chiropractors should be the spinal health experts in the health care system. This was followed by Palmer College of Chiropractic's statement that doctors of chiropractic should be the primary care professionals for spinal health and wellbeing.

In an era of health transformation, the need for skilled spinal health professionals who can operate either alone or in a collaborative setting has never been greater. Low back pain has been identified as the leading global cause of disability, while neck pain ranks fourth in the same table. The persistent call for an evidence-based, biopsychosocial approach to healthcare means that today's chiropractors need to embrace a range of skills as they assess, treat, manage and promote spinal health.

This WFC/ACC Education Conference will explore and address the necessary attributes of a spinal health expert in 2016 and beyond. It will focus specifically on the shift to collaborative teamwork in health and how the modern methods of knowledge transfer may drive changes in curricula and accreditation standards.

We shall also be looking at the latest developments in the teaching and learning of manual treatment skills. With experts from around the world, both scholarly and practical aspects of this key area of chiropractic education will be presented and debated.

Who should attend?

This conference addresses subjects that are of importance not only to those who are engaged in education and research but also to practising chiropractors.

The meeting will be of interest to leaders and faculty from chiropractic educational institutions and organizations as well as representatives of chiropractic associations and all interested in current developments in healthcare delivery systems relevant to chiropractic.
